

Sivoia® QS Shading solutions

Total light control

Sivoia® QS | Shading solutions

Total light control from Lutron®

Sivoia QS is the ideal solution for total light control. The Sivoia QS shading product family includes Venetian blinds, roller shades, drapery systems, Roman shades, and tensioned shades.

Its simplified wiring and common communication language allow for easy integration with Lutron lighting controls and whole home systems, including HomeWorks® QS and GRAFIK Eye® QS. Control both electric light and daylight at the touch of a button.

Precision control of daylight

- Control shades with precision and elegance
- Shades start, move, and stop in unison, maintaining perfect alignment with each other (within .125 in. [3.17 mm])
- Minimal, symmetrical 0.75 in. (19 mm) light gaps ensure maximum window coverage

Total light control

- Seamless integration with HomeWorks QS and GRAFIK Eye QS for intuitive control of electric and daylight
- Integration with other Lutron lighting control products
- Adjustable light and shade zones for scene control

Ultra-quiet performance

- Manage daylight without disturbing the activity in a space
- Near-silent level operation rated at less than 38 dBA at 3 feet (44 dBA at 3 feet for roller 20™)

Easy to design, install, and integrate

- Simplified low voltage wiring scheme
- Built-in diagnostics to verify system communications

Simple operation, beautiful aesthetics

- Simple, intuitive control of shades, draperies, and lights with seeTouch® QS keypads
- Wide variety of styles, colors, and metal finishes to complement your décor
- Backlit, engraved buttons for visible, intuitive control
- Preset buttons instantly recall a favorite light level or shade position

Total light control at the touch of a button with the GRAFIK Eye® QS control (not actual size)

Sivoia® QS | System solutions

Sivoia QS shading solutions can scale from a standalone shade system to a total light control solution that integrates precision shading with lighting control.

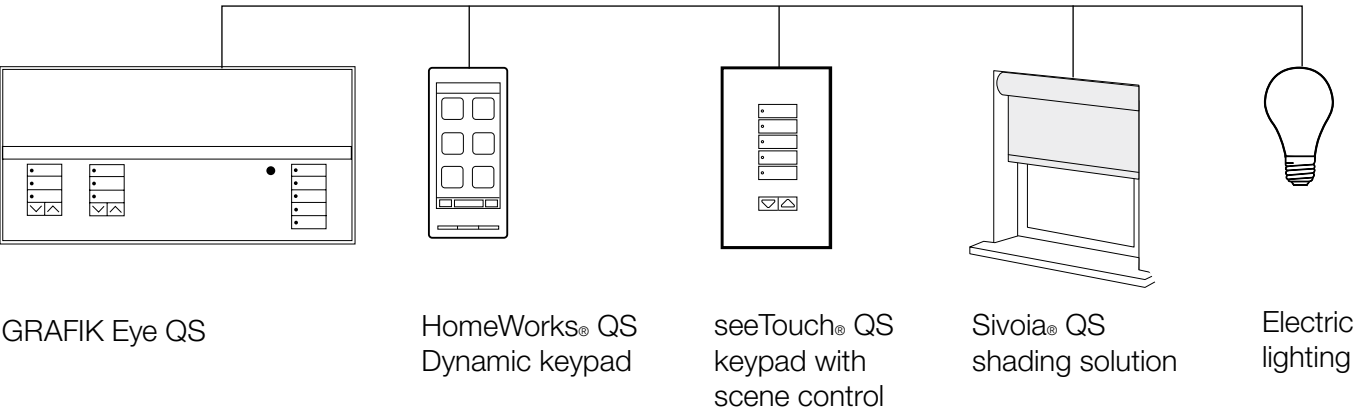

Standalone shade control system

Daylight control

Daylight is a source of light and needs to be controlled to provide the right light level for the activity. Sivoia QS shading solutions provide quiet, precision control of daylight at the touch of a button.

Integrated shade and light control system with GRAFIK Eye® QS or HomeWorks® QS

Total light control

Sivoia QS shading solutions integrate seamlessly with GRAFIK Eye® QS or HomeWorks® QS for total light control. Create and recall lighting scenes by automatically adjusting electric and daylight zones at the touch of a button.

Explore the following solutions to understand how total light control can impact your space.

Total light control | Commercial

Beyond seating arrangements and AV equipment, lighting is a key element in a function room with changing needs. Lutron® Sivoia® QS shading solutions transform a space from reception hall to conference room and back.

• General
• Meeting
• Presenter
• A/V
• Off

The shades and draperies are open, filling the room with daylight and revealing the view to create an impressive, yet welcoming, environment for clients. The lights are dimmed to conserve energy without sacrificing an evenly illuminated conference space.

• General
• Meeting
• Presenter
• A/V
• Off

Shades are lowered to eliminate unwanted glare from direct sunlight, thereby maximizing room comfort during meetings.

• General
• Meeting
• Presenter
• A/V
• Off

Draperies close to darken the room for an A/V presentation while adding a soft, elegant touch to the space. General light levels are low to provide sufficient light for note-taking.

seeTouch® QS keypads provide control points throughout a space. Control shades, draperies, and lighting scenes at the touch of a button.

Total light control | Commercial

Conference rooms demand flexible control in order to accommodate a number of activities. Adjust shades and lights for roundtable discussions, presentations, and even cleanup.

Shades are open to allow daylight in, brightening the room to energize the staff for a morning meeting. The lights by the window are dimmed to save energy.

Silently lower sheer shades to reduce glare and solar heat gain, while preserving the view in this west-facing conference room. The lights put the focus on the table for an afternoon meeting.

Blackout shades lower through side channels to completely block daylight. General light levels are set low to ensure maximum visibility of the screen with enough light for note-taking.

Multiple shade and drapery groups can be controlled independent of scenes with the GRAFIK Eye® QS.

Total light control | Residential

With Lutron®, choosing the perfect lighting levels for different activities and occasions throughout the home is easy. Transform the living room for family gatherings, reading, watching a movie, or entertaining.

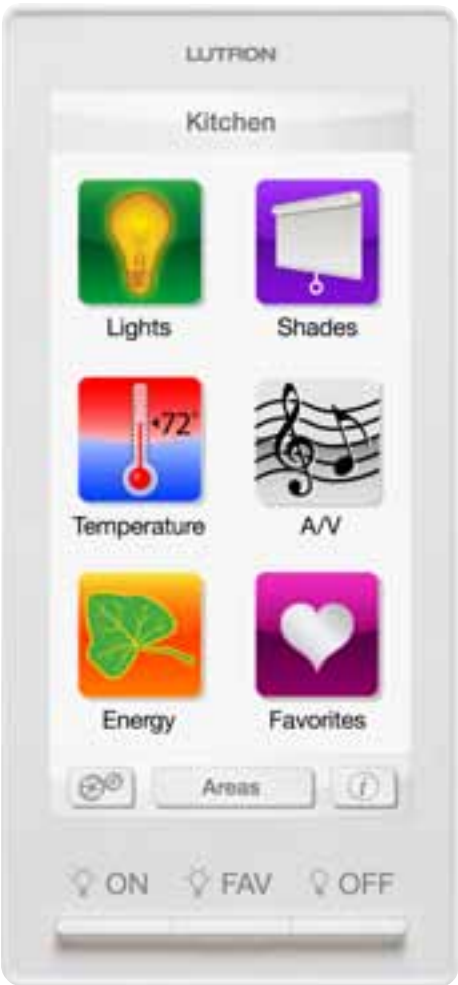

The shades are partially open to reveal the view and take advantage of daylight for activities such as games or cleaning. The lights are off to save energy.

The “Favorite” TV scene creates a casual atmosphere. Shades are partially closed to create privacy and lights are set at a medium level.

A single button quietly lowers shades and lights for the perfect “Favorite” movie setting. Blackout shades close to block daylight and ensure a clear view of the screen without reflections or glare. Lights are dimmed for optimum viewing conditions. Integrated AV control is just a button press away.

Eliminate wall clutter with the dynamic keypad. Use it to adjust lights, shades, HVAC and audio/visual equipment from one convenient location. And with one touch of the “Energy” button, you can dim lights, lower shades, and reduce heating or cooling.

Sivoia® QS:

System components

Shading solutions

(One common communication link)

Sivoia QS Venetian blinds

- Independent control of lift and tilt
- Uniform positioning across adjacent blinds
- See pages 12-13

Sivoia QS roller shade

- Provides ultra-quiet, precision control of daylight
- See pages 14-17

Sivoia QS drapery track

- System allows for pinch pleat and ripplefold style options
- See pages 18-19

Sivoia QS tensioned shade

- Smooth, quiet, precise movement of skylight, angled, and bottom-up shades
- See pages 20-21

Sivoia QS Kirbé® vertical drapery system

- Eliminates “stackback” with a rolling pleated fabric that rises out of view
- See page 22

Sivoia QS Roman shade

- Provides the same elegant movement and precise control as Lutron® roller shades
- See page 23

Control options

seeTouch® QS keypads

- Control shades, draperies, lights, or any combination in one space
- Available in a variety of styles and button configurations
- Optional raise/lower buttons and an infrared sensor available

Sivoia QS infrared remote

- Provide personal control of an individual shade/drapery or groups of shades/draperies
- Offers open, close, preset and raise/lower control
- Works with Sivoia QS IR receiver

Power and integration

QS smart panel power supply

- Provides power and communication wiring to Sivoia QS shades, keypads, and other devices
- Manual override buttons for system verification
- Built-in link diagnostics for easy confirmation of system wiring and communication

Individual power supply

- Provide power to a single shade or drapery

Ethernet/RS232 interfaces

- Allow for seamless integration of lights and shades with A/V and building management systems

Input/output device

- Simple, third-party interface with contact closure input

Lighting control/integration

HomeWorks® QS

HomeWorks QS integrates the control of electric light and daylight via keypads, apps, sensors, and timeclock events. The system also controls heating and air-conditioning, as well as integrates with audio-visual equipment for total control of a home's environment.

GRAFIK Eye® QS

GRAFIK Eye QS provides an easy, efficient way to control both electric light and daylight by adjusting lights and shades for any task or activity at the touch of a button. The system saves energy while meeting the aesthetic, functional, and regulatory needs of any project or space.

Power modules

- Adaptive technology controls either magnetic or electronic transformers for low-voltage lighting
- Modules available for 120V or dual voltage (120V and 277 V)

Quantum total light management

- Automatically dims or switches all electric lighting and controls daylight using automated window shades
- For more information, refer to P/N 367-1321 or visit www.lutron.com/quantum

Sivoia® QS:

Venetian blinds overview

Venetian Blinds with individual lift and tilt control
Superior functionality is revolutionizing the category of automated horizontal blinds. Now you can have optimal privacy, while still preserving your view and controlling the amount of sunlight in a space thanks to the ability to independently control blind height and slat angle.

Set your favorite height and tilt angle for the slats; shades will automatically adjust to that setting with the touch of a button. With the capability to remember multiple preset positions, the blinds provide a range of options for automatic adjustment.

Individual lift and tilt control ensures that the slat angle between adjacent blinds remains within 1/16th of an inch of each other for a clean look.

Choose from a variety of slat colors, finishes, and style options to customize your blinds to your space. All slats are 2 inches wide and are available in genuine hardwoods, stained or painted woods, and aluminum.

Add a bold accent with decorative tapes, which conceal lift cords and increase light-blocking performance.

Blinds can work as standalone products or within a whole home system, and can be operated by a variety of keypads, controls, and smart devices.

Sivoia® QS:

Roller shades overview

Sivoia® QS shades are the ideal solution for ultra-quiet, precision control of daylight. Roller shades are available in different sizes to accomodate the needs of any application.

Small- to medium-sized windows
roller 20™ and roller 64™ have small tube diameters that make them the perfect solution for small- to medium-sized windows in the office or at home.

Floor-to-ceiling windows
roller 100™ and roller 150™ are designed for larger windows, such as those in floor-to-ceiling applications. These windows are often found in offices and condominiums.

Curtain walls
Couple up to 6 shades as a single group with one Electronic Drive Unit (EDU) using roller 200CW or roller 150™.

Wide windows
WIDR tube option designed to minimize deflection for wide windows of average height. Available for roller 100™, roller 150, and roller 200CW.

Multi-story windows
roller 225™ provides a heavy-duty bracket and higher torque for much larger applications. Add precision control of daylight in atriums, lobbies, and in areas with multi-story windows.

Sivoia® QS:

Drapery systems overview

Sivoia® QS drapery systems respond to the touch of a button.
Operate pinch pleat or ripplefold drapery systems for quiet, elegant, convenient control of daylight.

Straight tracks

Draperies add a soft, elegant touch to your décor. Control pinch pleat or ripplefold styles on straight tracks using Sivoia QS drapery drives.

Curved tracks

Curved tracks are available and add a unique aesthetic to spaces with specific design needs.

Long tracks

A track splicing option facilitates the shipment and installation of long drapery tracks. Long standard track lengths are up to 30 ft (9144 mm) for a single spliced track or up to 60 ft (18288 mm) for spliced, tandem systems.

Drapery track drive options

Sivoia QS drapery drives are designed to carry draperies of different weights.

Available options are:

- D105 – for draperies up to 105 lbs (48 kg)
- D145 – for draperies up to 145 lbs (66 kg)
- D175 – for draperies up to 175 lbs (79 kg)

Visit www.lutron.com/draperytrack or see P/N 367-1527 for more information.

Sivoia® QS:

Tensioned shade overview

The tensioned shade from Lutron® combines Sivoia® QS technology with a unique patent-pending tension system. This innovative system functions as a skylight, angled, or bottom-up shade and keeps fabric taut and parallel to windows regardless of slope.

- Angled shades
- Skylight shades
- Bottom-up shades

Aesthetics

- Concealed cable guides maximize view through window
- Wide variety of high performance fabrics

Control

- Smooth, quiet, precise movement of tensioned shades creates elegant transitions
- One-touch control of hard-to-reach shades through keypad or IR remote
- Seamless integration with other Lutron® Sivoia QS products and lighting controls

Installation

- Flexible system operates in skylight, angled and bottom-up installations
- Inside, recessed, and outside mounting options allow system to fit any application
- Pre-assembled shipping available to maximize installation convenience
- The meet-in-the-middle shade is available for larger applications. With its unique tension system allowing two drives to close shades simultaneously from the same frame, this shade can accommodate openings of 24 feet.

Design

- Unique tension-absorbing frame eliminates stress on the surrounding ceiling structure
- Reliable performance under extreme temperatures is ensured by weld- and seam-free design
- Scalable design allows for control of shades up to 70 sq. ft. in size*

Visit www.lutron.com/shadingsolutions or see P/N 367-1530 for more information.

* Larger shades may be available based on fabric selection. Contact customer service or use the SCT for actual shade dimensions based on fabric type.

Sivoia® QS:

Kirbé® vertical drapery system overview

An industry first – this entirely new type of window treatment smoothly pulls the drapery up and out of the way at the touch of a button. The Kirbé vertical drapery system captivates with its unique and unexpected motion.

Kirbé is offered in a variety of fabrics from the Avant Collection™.

Optional roller 64™ integrates seamlessly with the standard Kirbé brackets to allow for complete privacy and additional daylight control.

A decorative Lutron® cornice easily completes the look with no need for a recessed pocket.

Sivoia® QS:

Roman shades overview

Lutron® Roman shades with CERUS® safety technology

A revolutionary design in Roman shades; the new Cord Eliminating Roman Uptake System (CERUS) removes the lifting cords associated with normal Roman shade construction to create safer shades with quieter, smoother operation. Lutron Roman shades utilize the same ultra-quiet, precise electronic drive technology found in Lutron roller shades (roller 64™ and roller 100™ drives available).

About CERUS safety technology

Eliminating cords from the traditional construction of Roman shades has two major advantages.

Improved performance

CERUS safety technology allows for quieter, smoother, more even travel of the shade since cords are not stacking and slipping as they roll.

Safer

CERUS safety technology also creates a safer Roman shade by utilizing mesh bands in place of exposed inner cords that may pose a strangulation hazard to small children.

Cornice	Avant Collection	Soft fabrics	Shape	-

Choosing the right fabric is critical to a successful shading project. Fabric selection is determined by evaluating the orientation of each elevation and the designer’s objectives.

Before specifying fabric, follow these steps:

Consider the application

- Commercial or residential
- Multi-purpose or dedicated function rooms
- Day, night, or all-hours use
- What types of activities will occur in the space
- Will an aesthetic match be important inside or outside the building

Prioritize needs

Based on the application, determine priorities:

- Control glare inside (reduce reflections on computer monitors, TVs, etc.)
- Maintain view through shades
- Protect interiors from fading
- Reduce solar heat gain
- Achieve a particular aesthetic (inside or outside)
- Reduce environmental impact by selecting a sustainable fabric
- Create privacy
- Create a darkened room

If a space is multi-purpose or several priorities are equally important, consider a dual-mount application with two fabrics on the same window (typically a sheer coupled with a dim-out or blackout).

Sustainability

Often fabrics are manufactured with chemicals to make them durable. Lutron® sustainable fabrics reduce or remove many of these chemicals in order to improve indoor air quality. Others are made from recycled content in order to protect the environment. Refer www.lutron.com/fabrics to find which fabrics are either PVC-free, recycled, GREENGUARD®, Cradle to Cradle Certified™, or Oeko-Tex® Standard 100 certified material.

Choose a collection:

Lutron offers multiple fabric collections tailored to each product family.

The Classico Collection™

For larger roller shade applications, durable and long-lasting fabrics are a necessity. The Classico Collection by Lutron includes wide roll widths, fire-rated materials, and an array of sustainable options.

The Gallery Collection

The Gallery Collection by Lutron offers a variety of color, texture, and pattern to accent any residential décor. Add beauty to traditional roller shades with interesting patterns, intricate weaves, sophisticated suedes, or colorful linens.

The Avant Collection™

Featuring woven woods, sheers, and soft fabrics, the Avant Collection offers over 100 contemporary and traditional materials for Kirbé® vertical drapery systems, cornices, finished drapery systems, and Roman shades with CERUS® safety technology.

Venetian Blinds

With a variety of 2 in. slat options in hardwoods (genuine, stained, and painted) and aluminums, as well as the option for custom color matching, there is a style option to enhance any room. Choose from one of our four wooden valances for a finished look, and accent the blinds by adding decorative tapes.

The GREENGUARD INDOOR AIR QUALITY CERTIFIED Mark is a registered certification mark used under license through the GREENGUARD Environmental Institute. Cradle to Cradle Certified™ is a certification mark of MBDC.

- Maximum 100 zones (Sivoia QS roller shades, Venetian blinds, drapery systems, tensioned shades, Roman shades, and lighting zones on GRAFIK Eye QS)

Sivoia® QS

Specification benefits

Lutron® has been the world’s leading manufacturer of lighting control systems for 50 years. We focus on continual innovation, while offering world-class service and global support.

Control

Ultra-quiet electronic drive

The Sivoia® QS system is low-voltage and operates at a near-silent level (rated at less than 38 dBA at 3 feet*). Shades move smoothly and stop at preset positions with no audible clicks.

Total light control

Lutron lighting control systems integrate with Sivoia QS shades and draperies, offering intuitive control of both electric light and daylight. GRAFIK Eye® QS, HomeWorks® QS, and Sivoia QS use the same wiring configuration and do not require any interfaces, ensuring seamless integration for total light control.

Installation

Simple reconfiguration

The Sivoia QS system can be easily reconfigured, limits can be changed, and presets can be reprogrammed, without rewiring, through the remote, keypad, or electronic drive unit (EDU).

Simplified wiring

Sivoia QS shading systems do not require any group controllers, relays, or line-voltage wiring between electronic drive units.

QS Smart Panel Diagnostics

The QS Smart Panel power supply features advanced diagnostics to quickly verify system communication and wiring.

Flexibility and performance

Limits and presets never lost

Precise limits and preset shade positions are electronically set and have a power-failure memory for the life of the system. These limits and presets will never drift regardless of age, electrostatic discharge, or power failure.

Sustainable solutions and LEED™

Lutron shading and lighting controls may contribute to obtaining points in several LEED credit categories.

System warranty and support

Sivoia QS systems come with an 8-year limited warranty, plus optional extended service. Lutron has factory-employed field service engineers throughout the world and is the only lighting control or shade systems manufacturer in the world with a 24-hour, 7 days a week technical support center.

Aesthetics

Minimal, symmetrical light gaps

Sivoia QS roller shades offer symmetrical light gaps of .75 inch per side.

Elegant control options

Lutron controls are designed to match the high-end look and feel of today’s premiere working and living spaces. They are available in a wide variety of colors and finishes, including metals.

Wide array of fabrics

Lutron shading systems are available in fabric styles to suit any function or aesthetic need, including many sustainable fabric choices.

*44 dBA at 3 feet for roller 20™

About Lutron®

Our commitment

Lutron is committed to bringing our customers best-in-class products and solutions that offer superior performance with world-class service and global support.

Light control is environmentally responsible. Lutron develops high-quality, elegant lighting solutions that reduce energy costs significantly. We innovate in advance of emerging market needs and continually streamline our quality, our delivery, and our value.

Lutron has hundreds of issued U.S. utility and design patents, and many more granted patents and design registrations in countries around the world. For 50 years, we have met and exceeded the highest standards of quality and service. Every one of our products is quality-tested before it leaves the factory. We are available to help, on the phone or in the field, whenever we are needed.
